BASK IN LUXURY

DuraGreen[®] bask in luxury

DuraGreen is a leading, innovative architectural lighting brand in the UK, specializing in crafting miniature lighting fixtures that blend style and functionality.

A collection of timeless artwork echoes circular economy principles. Unparalleled in their versatility, ACME's lighting fixtures are designed with the needs of premium residential and commercial spaces in mind.

Bask in Luxury

Bask in Luxury

You see so much in only one day.

Saturated by light and noise, it's easy to lose sight of those small things that enrich our lives, those little differences that leave a mark.

DuraGreen specialises in crafting miniature lighting fixtures that blend style and functionality to bring out the true value of any room.

Our innovative products are small solutions that make a great change in perception, creating the luxury lifestyle you are looking for.

Circularity in Style

Our light fixtures are made of the highest quality metal materials, like pure aluminium and copper. Our process is precise and sustainable to achieve circular products that last longer and look stylish.

British heritage

We embody British heritage with our elegant presence and exceptional craftsmanship.

We transform premium materials into fine luxury goods that elevate any space.

DuraGreen[®]

Our team takes great pride in offering the highest quality products to our discerning customers.

Global product compliance certification

We have compliance certifications for selling and exporting lighting fixtures globally. We continually monitor regulatory developments and promptly respond to new market requirements.

CB

The CB testing scheme, established by the International Electrotechnical Commission (IEC), involves participation from over 50 countries. By ensuring compliance with recognized safety standards, it facilitates global trade. Accredited laboratories issue CB certificates, which are mutually recognized by participating countries, reducing redundant testing and enhancing consumer safety.

60-MINUTE FIRE RESISTANCE

The 60-minute fire resistance test for recessed downlights in the UK assesses their ability to contain fire and prevent heat transfer for one hour. This evaluation ensures that downlights maintain structural integrity and minimize fire spread, thereby enhancing safety in building designs and compliance with fire safety regulations.

CE

CE certification signifies that a product meets European Union safety, health, and environmental standards. It is mandatory for specific products sold in the EU market. By affixing the CE mark, manufacturers demonstrate compliance, facilitating market access and ensuring consumer safety while adhering to stringent EU regulations.

UKCA

The UKCA certification (UK Conformity Assessed) is a mandatory marking for products placed on the market in Great Britain. It demonstrates that the product meets specified safety and performance requirements. It replaced the CE marking for most products in the UK following Brexit. Compliance ensures product legality and market access.

GLOBAL MARK

The Australian Certification Global Mark signifies that a product complies with Australian safety and performance standards. It is a voluntary certification scheme that enhances consumer confidence and marketability. By displaying the Global Mark, manufacturers demonstrate adherence to rigorous testing and compliance, ensuring product safety and reliability in the Australian market.

CCC

CCC certification, or China Compulsory Certification, is a mandatory safety mark for products sold in China. By obtaining CCC certification, manufacturers demonstrate that their products meet regulatory requirements, enhancing consumer safety and facilitating market access in China.

Think art of light

Lighting is a key element in design that greatly influences mood, emotion, and ambiance. A high-quality lighting solution has the power to elevate your designs to a whole new realm. When designing our lighting creations, we bear in mind the profound impact of light and shadow on the overall atmosphere of a space.

Tailored Illumination

At DuraGreen, our team of skilled technicians and engineers work closely with lighting designers, architects, and interior designers throughout the entire process—from conceptualization to installation. Quality is paramount. We strive to provide the highest quality lighting fixtures that perfectly aligns with the unique needs and function of each environment, ensuring the utmost satisfaction for occupants and visitors.

Katia Saliba

Architect

Dedication to Excellence

Our steadfast commitment to design excellence and unwavering innovation ensures that we provide unrivaled solutions that not only meet, but surpass, the ever-evolving requirements of our clients.

Our dedication to excellence extends beyond our products. We pride ourselves on offering outstanding customer service, leveraging our strengths and decade of expertise to exceed our customers' expectations.

Craftsmanship

At DuraGreen, we take pride in our dedication to the art of craftsmanship. Almost all of our lighting fixtures are meticulously crafted with pure aluminium using masterful techniques, resulting in a flawless finish that exudes sophistication. Our commitment to luxurious aesthetics ensures that every product is a testament to both form and function.

DuraGreen is also renowned for its expertise in bespoke product design and manufacturing. Whether it is for a premium residential or commercial project, we are adept at creating tailor-made solutions that perfectly complement the unique requirements and vision of our clients.

Who says compact lighting can't pack a punch?

DuraGreen is breaking the mould, providing an array of compact lighting fixtures that deliver both power and comfort.

These small lights seamlessly blend cutting-edge technology, practicality, and sleek design, creating a visually stunning addition to any space.

Think Small

Sustainable Future

Illuminating with purpose, we strive to bring light precisely where it is needed. By minimizing the presence of extraneous lighting fixtures, we champion resource conservation and a more sustainable path. This commitment translates into reduced power consumption, lower maintenance requirements, and decreased energy costs.

In our quest for a greener future, every product we offer proudly embodies an environmentally friendly ethos. Together, we are playing our part in safeguarding the precious world we call home. But our endeavors do not stop there. We are diligently working towards supplying luminaries, informed by the Cradle to Cradle® principles, paving the way for a circular economy. With this innovative approach, we are forging a path towards a more sustainable and environmentally conscious future.

Circular Product Solution

The solderless LED holder offers a convenient and streamlined approach to constructing natural white single-color or tunable white LED assemblies. By securely fastening the module to its heat sink using 2 screws and push-fit electrical connections, manual soldering of LEDs is no longer necessary. This not only protects the LED from excessive heat but also maintains a clean surface free from solder flux residue.

One notable advantage of using this holder is that it transforms light fixtures into true circular products, supporting our long-term commitment to sustainability by providing a direct and uncomplicated method for repair and reuse.

Additionally, we have incorporated holders for light lenses that adhere to Zhaga standards, an international organization in the lighting industry, which is focused on standardizing interfaces of LED lighting fixtures, including LED light engines, modules, arrays, and holders. Thanks to this, we can offer more material options for enhanced serviceability through repair and reuse.

2700K, 3000K, 3500K,

DuraGreen's Circular Product Approach

The way companies design and manufacture products today has a direct impact on the world we will inhabit tomorrow. Merely recycling is not enough. We are paving the way for a world where all materials and products are made with tomorrow in mind.

Rooted in the Cradle to Cradle® design principles, this approach requires every step of a product's use cycle – from design and production to end-of-life – to follow a circular pathway. Today, it is possible to reshape the way we design and produce things, using innovation to drive change.

DuraGreen's products labeled with the 'circular use' sticker are designed for easy cycling and disassembly. These products include materials such as pure aluminum and solid brass while excluding plastics from their structures to increase the cycling rate for their subsequent use. Additionally, our many customer service centers (authorized distributor offices/shops) offer a rapid and convenient service for our clients, including replacing the LED chip and LED chip holder with two fixing screws and push-fit electrical connections onsite to extend the life of your lighting.

DuraGreen's 'circular use' light fittings are easily disassembled for their cycling pathway. 99% of the product's weight comprises materials compatible with the intended cycling pathway, with only the LED chip and LED chip holder requiring replacement for the next cycle of life.

DuraGreen's circular products come with:

- 10-year warranty
- Lifetime upgrading, repair, and reuse services
- End-of-life service (return unwanted light fittings to DuraGreen so they can be reintroduced into standard stock)

Lighting for better health and well-being

DuraGreen Full Spectrum LEDs

Crafted to replicate natural light, the DuraGreen full spectrum LEDs are engineered using cutting-edge chip, phosphor, and packaging technology to closely mimic the visible wavelength range of natural light. These LEDs can be effortlessly integrated into most DuraGreen lighting fixtures, bringing the beauty of full-spectrum natural light indoors and positively impacting the occupants' well-being. With high-fidelity spectral output, these LEDs provide exceptional colour rendering and superior TM30 metrics, making them ideal for a wide range of lighting applications. From retail, hospitality, office and education to museums, healthcare and residential lighting - the possibilities are limitless.

Spectral Matching to Natural Light

Average Spectral Difference (ASD)

The lighting industry is currently in the early phase of embracing human-centric lighting (HCL), which focuses on how lighting impacts the physical and emotional well-being of individuals. As humans have evolved over the millennia, our visual system has adapted to the natural light emitted by the sun and fire. These light sources have defined spectral power standards in terms of spectral power, which describe the nature of natural light. However, conventional metrics such as CCT, CRI, and TM-30 are unable to accurately qualify or quantify the naturalness or similarity of artificial light sources to these standardized natural spectra.

Bridgelux, recognizing the lack of an industry-standard metric for measuring the naturalness of light sources, has pioneered a new metric called Average Spectral Difference(ASD). This metric removes the uncertainty when comparing LED light sources to natural light. ASD is determined by assessing the absolute difference between two spectra at specific wavelengths. Natural light possesses an ASD value of 0%, indicating an exact match. Lower ASD values indicate a closer resemblance to natural light.

DuraGreen full spectrum LED is engineered to provide the closest match to natural light available using proprietary chip, phosphor ,and packaging technology, resulting in an ASD between 8% to 10% for all CCTs. By comparison, standard 80, 90, and 98 CRI light sources have ASD values that are 100% to 300% larger than full spectrum LEDs.

Spectrum Characteristics

EVO-STRIP

Evo-Strip is a premium range of flexible strips crafted for the most stylish residential and commercial interiors that demand exceptional colour rendering and consistency. Evo-Strip lights achieve an impressive CRI 98, aligning flawlessly with our full spectrum downlights and spotlights. Our RGBCW solution offers a dynamic combination of RGB and tunable white (2700K to 6000K) in a single product, effectively resolving the issue of brightness often experienced with white lights on RGBCW strips. With an innovative wall wash lens within a sleek micro aluminium profile, our linear lens lends itself perfectly to wall washing, curtain or shutter lighting, and even kitchen worktop lighting.

H2(mm) 10

Accessories not included

CHY-1
aluminium profile

CHY-2
aluminium profile
with glare shield

IP Rating:

IP67

Optics:

15°/30°/25°/45°

CRI:

>80Ra

Lifetime:

>50,000 hrs (L70 B10)

None

£ 90.91/m

CCT:

RGBW

LEDS/M:

28pcs

Control:

On/off, Mains Dim, 0/1-10V, Dali, Zigbee, Casambi

Binning

2 Step MacAdams

Voltage:

DC 24V

Power(W):

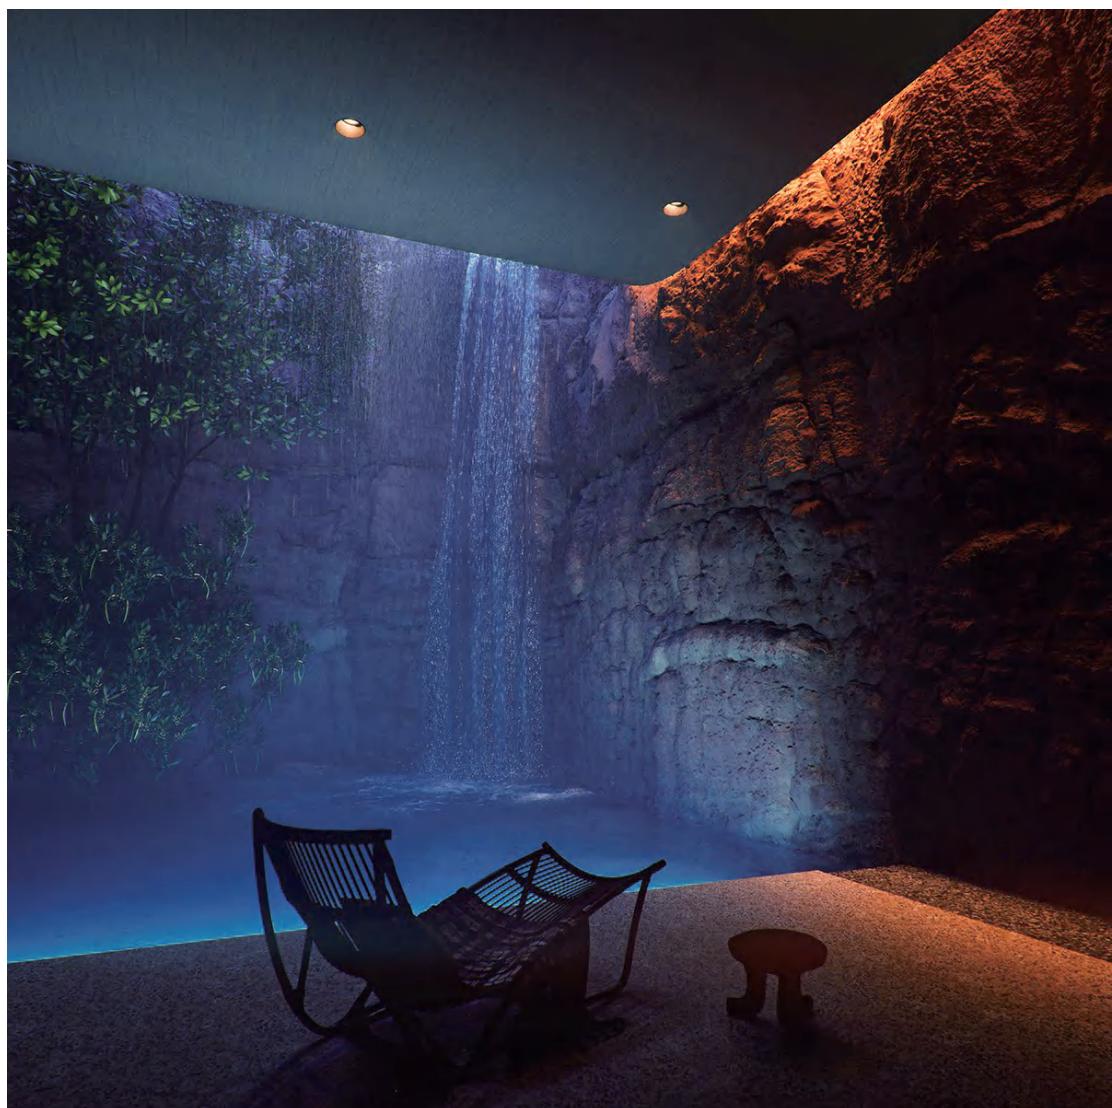

18W/m, 24W/m

Ambient temp:

-20 °C to 45 °C

Class:

III

W system	lm system	optics	code
R=4W	35Lm/W	25°45°	CYH201028-24W-2545-RGBW

B=4.3W	11Lm/W		
W=7.5W	96Lm/W		
CW=7.5W	96Lm/W		

Accessories

Link Cable 1m

£ 14.24

TECHNICAL FEATURES

Code:	LC-001
Environmental	
Temperature:	-40~105 C
Relative humidity:	90%+40 C
Voltage Rating:	125-250V AC,DC
Current rating:	8A
Contact resistance:	≤0.1Ω
Insulation resistance:	≥100MΩ
Resist-Electric strength:	500V AC/min
Waterproof Level:	IP 67

Link Cable 10m

£ 37.08

TECHNICAL FEATURES

Code:	LC-010
Environmental	
Temperature:	-40~105 C
Relative humidity:	90%+40 C
Voltage Rating:	125-250V AC,DC
Current rating:	8A
Contact resistance:	≤0.1Ω
Insulation resistance:	≥100MΩ
Resist-Electric strength:	500V AC/min
Waterproof Level:	IP 67

Link Cable 2m

£ 18.40

TECHNICAL FEATURES

Code:	LC-002
Environmental	
Temperature:	-40~105 C
Relative humidity:	90%+40 C
Voltage Rating:	125-250V AC,DC
Current rating:	8A
Contact resistance:	≤0.1Ω
Insulation resistance:	≥100MΩ
Resist-Electric strength:	500V AC/min
Waterproof Level:	IP 67

Link Cable 5m

£ 28.80

TECHNICAL FEATURES

Code:	LC-005
Environmental	
Temperature:	-40~105 C
Relative humidity:	90%+40 C
Voltage Rating:	125-250V AC,DC
Current rating:	8A
Contact resistance:	≤0.1Ω
Insulation resistance:	≥100MΩ
Resist-Electric strength:	500V AC/min
Waterproof Level:	IP 67

3 Way Cable Splitter

£ 19.04

TECHNICAL FEATURES

Code:	Y02-1-3+M12C-2P
Environmental	
Temperature:	-40~105 C
Voltage Rating:	125V DC
Current rating:	8A
Contact resistance:	≤10mΩ
Hight Voltage Resistance:	3KV
Insulation resistance:	≥500 MΩat DC500V
Waterproof Level:	IP 67

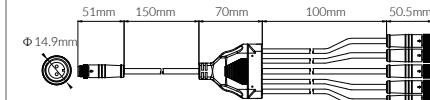

5 Way Cable Splitter

£ 23.20

TECHNICAL FEATURES

Code:	Y02-1-5+M12C-2P
Environmental	
Temperature:	-40~105 C
Voltage Rating:	125V DC
Current rating:	8A
Contact resistance:	≤10mΩ
Hight Voltage Resistance:	3KV
Insulation resistance:	≥500 MΩat DC500V
Waterproof Level:	IP 67

The spec information provided in this catalogue aims to offer comprehensive insight into our light fixtures. It is important to note that, similar to all electronic devices, slight variations may occur in the delivered products. As a result, different outcomes may arise under conditions that differ from our testing parameters (such as extreme cold or heat). While the results presented here provide an indication of the product's anticipated performance, it is vital not to solely rely on them as a warranty of performance or as a suitability indicator. If any products do not meet expectations, please do not hesitate to contact us for further assistance.
